

User stories:

1. See amount of saved carbon dioxide / money :

As a commuter I want to know how much carbon dioxide and money I save from taking the bus instead of the car.

Acceptance criteria

- Be able to see how much that has been saved since the last run of the application
- Be able to see how much has been saved over a few different periods of time
- Have the amounts saved displayed nicely in a graph

2. See companies saved carbon dioxide:

As a commuter I want to know how good different companies are at letting their workers ride public transport to work.

Acceptance criteria

- Be able to within the app visit a company's profile page and in the profile see:
 - how much a specific company saves in terms of carbon dioxide by using public transportation
 - how many employees the company has
 - how many EcoTravel registered people the company has.
 - read some basic information about the company.

3. See toplists:

As a commuter I want to know what companies are the best at letting their workers ride public transport to work.

Acceptance criteria

- Be able to see toplists of all companies within the app
- Be able to see toplists of all users within the app
- Be able to see the toplists in different time-intervals
- Be able to press an item in one of the toplists and get directed to that person or that company's profile page

4. Create company profile:

As a company owner I want to create my company's profile within the EcoTravel app.

Acceptance criteria

- Be able to create a company profile
- Be able to change the information displayed in a company's profile

5. Medals:

As a user of the EcoTravel application I want to have different milestones to give me additional motivation to travel with public transportation.

Acceptance criteria

- There should be at least 5 medals to achieve
- Be able to see what medals a user has achieved
- Be able to see the progress of each medal
